

COMMERCIAL SOLUTIONS DESIGNED SPECIFICALLY FOR INDOOR CULTIVATION

AIR CIRCULATION SYSTEM

GPS-ACS-2VENT (Narrow)

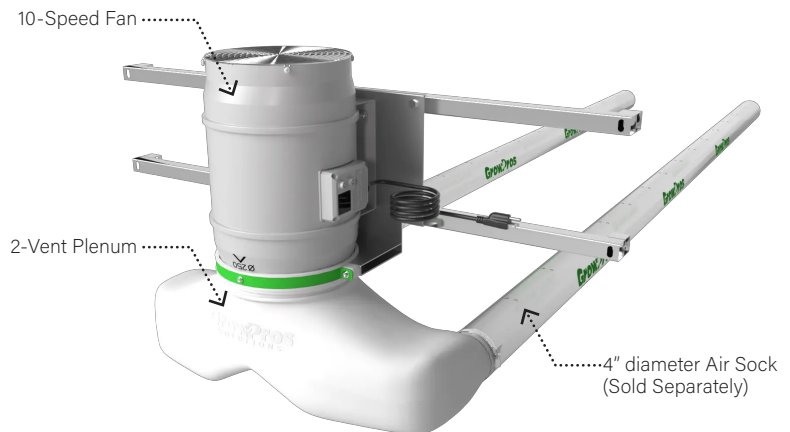

Developed through the insights and expertise of experienced cultivators, our system represents a groundbreaking advancement in air circulation technology for hydroponic cultivation. By challenging and redefining industry standards, we have created a solution that is not only efficient but also meticulously tailored to address the unique needs of modern growers. Our system is designed to optimize airflow, enhance plant health, and adapt to the varying conditions within hydroponic setups, ensuring that growers have a reliable and effective tool that truly works for them.

FEATURES & BENEFITS

- Designed for Grow Pros Solutions Multi-tier Rolling Rack.
- Allows precise airflow control for every growth stage.
- Extendable vent tube adapts to different growing setups.
- Requires less upkeep compared to traditional fans.
- Pairs seamlessly with any LED lighting system.
- Washable components with built-in antimicrobial properties.
- Plastic air sock Ø: 4 inches (Sold separately).

SPECIFICATIONS

RATED INPUT POWER	255W
RATED VOLTAGE	100V-240VAC
CFM	971.4
RATED CURRENT	1.5A (Max 2.7A)
ROTATING DIRECTION	CCW
OPERATING TEMP	-4°C to 140°C
RATED SPEED	3000 +/- 10% RPM
MAXIMUM AIRFLOW	1652 M ³ /H
MAXIMUM AIRFLOW STATIC PRESSURE	1059 Pa
NOISE LEVEL	74 dB
IP RATING	IP44
AIR SOCK DIAMETER	4 inches (Sold Separately)
2 VENT SPACING	14.6" apart (center to center)
