

Grand Harvest compressed Coco Cubes

Sustainability SOURCED - Ideal for indoor cultivators

The black fiber liner allows for ideal air pruning of the root zone and provides consistent air flow for regular dry back periods. The liner protects your roots from light pruning before your canopy is filled in completely.

Plant your seeds directly or insert your clones for the only transplant you'll need. Use the right sized cube for your specific needs based on plant count, spacing, and/or irrigation system.

Grand Harvest produces a superior coco choir product with unparalleled consistency and fully buffered media for your plants to thrive in.

	Triple-Washed	Others	Grand Harvest
EC (1:1.5 method)	< 0.7 mS / cm	< 0.5 mS/cm	< 0.1 mS/cm

STRAIGHT SHOOTER 8FT

The Straight Shooter 8ft conveyor belt can streamline harvests, clean up, and shipping. Link multiple Straight Shooters to increase efficiency and production needs.

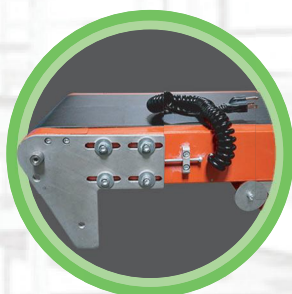

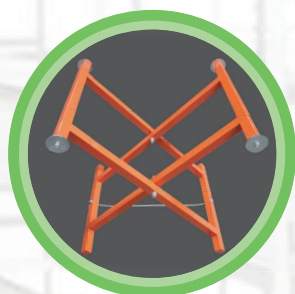

Operating at 41 ft/min, the Straight Shooter can move 300lbs along the 8ft belt. Made with a non slip rugged belt material your product is transported safely.

The Straight Shooter is made of high quality metals but designed to be portable for easy and quick set up.

Optional features include:

- 90° guard rails for turning.
- Variable speed control.
- Adjustable leg stand for height and pitch.

ROLLING BENCH

- Rolling benches help maximize every square foot of available grow space.
- Rolling benches reduces the need for multiple walkways.
- The hand crank wheel allows for easy side to side movement for the entire length of a fully loaded bench.
- The smooth rolling action, saves strength for more important gardening tasks.
- High quality metal alloy makes this rolling bench heavy duty but also light weight.
- Galvanized and powder coated surfaces are designed for a high moisture environment, our benches will not rust or corrode.

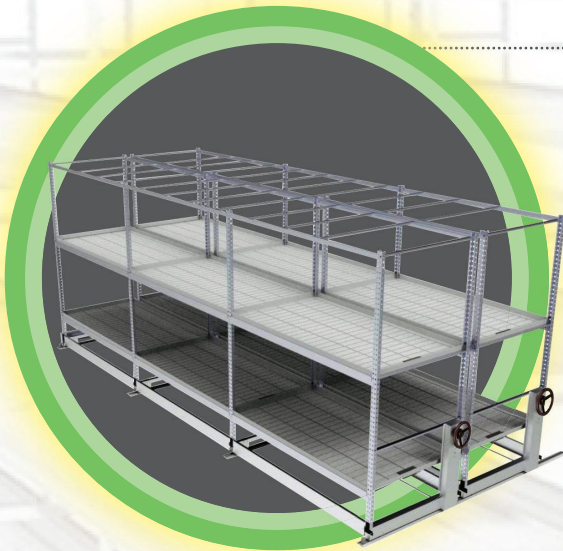

**adjustable legs are available in different heights, allowing for optimal distance from grow lights and easy sloping for drainage.*

**we can design and quote individualized set ups from anything from a napkin drawing, blueprint, or a CAD design file.*

MULTI TIERS ROLLING RACK

- Perfect for veg rooms or high ceiling flower rooms with adjustable height for each tier.
- The Vertical Grow Rack can be customized with multiple tiers to meet customers' needs.
- Smooth rolling action, minimal effort needed to make aisles, even when fully loaded with plants.
- All the tiers on each rack move together saving time and energy when working on each row.
- Built in upright supports and cross beams allow grow lights to be hung above all tiers.
- Designed for easy and fast installations, requires minimum tools and labor.
- Distance between tiers is adjustable (no tools are required).
- Continuous durable trays are made for easy drainage and cleaning.
- Optional walkways on upper tiers can slide under the trays on the adjacent row, making it much easier to efficiently garden the upper levels.

TWO TIERS STATIC GROW RACK

- Our specially tailored grow static racks create 2 complete levels for flower rooms.
- We will work closely with our customers to specifically design each system to customize each grow room layout.
- Heavy duty cat walks are fully secured to the top tier racks to create a solid second floor.
- The floors of the upper level cat walk are made of sturdy metal grates to allow for maximum air flow and environmental continuity.
- Grow racks and cat walks can be fully customized to any length and width.
- Our customized racks are compatible with our modular grow trays.
- Designed to make gardening on both levels much easier and more efficient. Decreasing labor costs and employee fatigue and increasing the quality and quantity of the harvest.
